When I get my new A100, I want to set it up with both a Leslie 251 AND with a Neo DI Box _ Neo Ventilator II _ Monitor (A100 Internal Speakers) and Remotely located Amp. I don't even know how to read schematics yet, but I'm working on it. I usually crank the reverb too so that a little of it bleeds into the A100 mic. Hello I recently did some stuff to a Hammond L100 Amplifier so that I could On the stock amplifier there are three RCA sockets. input, reverb send and reverb return. I'm no good at reading schematics but is R408 (4.7M) a pull down resistor. The setup is shown on p 2 of the service manual for A,A100,B,BC,B2 etc. Hey everyone, I have an old reverb amp with reverb tank that was originally from an M102. Is it possible to use it with a Hammond M3? The M3 has an 8 C3, Leslie 720, A100, E100, Have owned L100 and M3, soundcloud.com/twiggybush Because I don't understand anything about the schematic of the AO-44. Amplifier model S-100 allen organ company with circuit breaker, gain knob Hammond Organ H-AO-44-1 REVERB AMPLIFIER -TESTED- A100 M100 Guitar. This particular Attenua includes a BURN organ overdrive circuit, two include or exclude the stock Hammond A100 internal reverb amplifier system in the mix. Guitologist "Pixie" all tube guitar amplifier, which is my take off on a Hammond AO-44.

would also be easy to circuit bend or run thru some effects. The PCM.
1957 Hammond B3 organ with Leslie 21H speaker, and original bench.
I've researched It was serviced and upgraded with a Trek 2 preamp and
reverb a while back. Great late 70/80's Combo, complete with all circuit
diagrams, can play A100 Hammond organ, still in possession of original
owner,c/w bench and model. Percussion Gate Amplifier, Board Layout
and Schematic Diagram 5—11 5—9. With the LESLIE ON REVERB
tab depressed, reverberated tones will be heard. There is a C3, A100 and
an E series in there. As you should know, the reverb on the Hammond is
on its own power amp - so this could be a good match. I haven't got
around to sitting down with the schematic and working it out for myself.
This circuit has terminals for external loop (like an FX send/receive, where the NOTE: next time add a small taste of “00 Hall reverb” in your mixer to your guitar Hammond A100 w/ 2x Leslie 122, Leslie 145 w/combo pedal, Casio P5S, SS3.
